

Call for Papers

KOTEL – CEEES Conference

September 26th, 2008 - Vantaa, Finland

KOTEL (Association for Cooperation for Research and Development of Electronics) will organise Friday September 26th, 2008, the KOTEL/CEEES-conference in the field of environmental engineering. The conference will take place in a conference centre close to the airport in Vantaa, Finland. We invite you to bring forward your proposal with an abstract to the program of this conference.

The theme of our conference will be 'Management of Verified Environmental Stresses' with three subtitles which are seen to reflect the challenges of today:

- Testing,
- Simulation and calculations of environmental effects and
- Management and verification of environmental effects.

The first two subtitles will be held in parallel sessions and third subtitle is one common session. Ideas and contributions on other subjects within the theme are also welcome.

This conference will be connected with CEEES (Confederation of European Environmental Engineering Societies, www.cee.es) meeting that will take place in Espoo, Finland one day earlier, on September 25th. KOTEL will act as the hosting member of this international organisation. For this reason this Call for Papers is particularly aimed at the members of the CEEES-associations and for the members of KOTEL.

We look forward to a quick response from your side with interesting proposals.

Please take note that we would like to receive the abstracts before June 13, 2008 by e-mail <markku.juntunen@vtt.fi>. If any questions, please, do not hesitate to ask.

Yours sincerely,

A handwritten signature in black ink that reads "Antti Turtola".

Antti Turtola
