WEETCH	Colin	e2v Technologies/SEE	+ 44 (0)1245 453654	colin.weetch@e2v.com

1 - ADOPTION OF THE 52rd CONGRESS R&ESS MEETING MINUTES

The minutes are adopted.

2 - Apologies FOR ABSENCES

No apology for absence.

4- Report

The essential of the meeting is consecrated to preparation of the future.

1- Publication n°9

1-1 is on the CEEES Web Site and can be downloaded for free

1-2 SEE chairman of technical SEE Forum Climatic and Reliability Testing sent me a letter proposing the services of his group to improve the publication n°9 ; this proposal is welcomed by the CEEES R&ESS TAB.

2- Highly accelerated ESS: ASTE has published a recommendation in French and in English that is sold on ASTE WEB site.

ASTE has offered during the Porto meeting to utilize this recommendation as a basis for a future CEEES Recommended Practice on aggravated Stress Screening .

After exchange of positions during the Brussels Plenary Session, it appears that as the final version will be edited and distributed by ASTE, it's not necessary to establish a specific agreement between CEEES and ASTE. The draft document will be distributed to the CEEES R&ESS TAB members with a text in filigree on each page " ASTE property – distribution limited for CEEES R&ESS TAB members " for the purpose of the document improvement,

3- France has developed a Mechanical Guide ref."PR-NORMDEF-01/01" (available in English for free on ASTE WEB site) ; the equivalent climatic guide is on the way to be finished next December (structured in a heading document and 6 tomes in appendix) ; one copy of the last version of it has been provided in French to Dave RICHARDS , during a recent EG8 meeting in Paris (too heavy to be released by email) . It can be distributed to the all the CEEES TAB members at the occasion of the next meeting... After exchange of ideas within the CEEES R&ESS TAB., it appears that a new CEEES R&ESS draft on "ACCELERATED TESTS " could be constituted on the basis of the models of degradation existing in these two upper documents. Henri will prepare this draft.

4- Tour of table :

a. Harry Roosen : is quitting Sony Ericsson , and doesn't know so far if he will be available to attend next CEEES meetings ; Harry has written a document on “ The future of Reliability”

b. Helge Palmen informs that :

- i. The Kotel Reliability Group is reactivated
- ii. A document has been elaborated, in English, on the Reliability in product life cycle,
- iii. The future themes that interest Helge are : physics of failure, accelerated life testing, warranty testing,

c. Colin Weetch evocates the growth in SEE members : 200 new members, a lot coming from overseas (Singapour).
